Task 3: (M2, all R)

(M2) Ask the user to choose any point p in the image A and apply the following iterative operation $X_k \equiv \{ X_{k-1} \oplus B \} \cap A^c, X_0 \equiv \{ p \}, p \in \mathbb{Z}^2$ until $X_k \equiv X_{k-1}$. As the result $Y \equiv X_k \cup A$ should be given (basic structural element B here is (iv) but other can also be tested).	HELP
